## **DETAILED ACTION**

### ***Election/Restriction***

1. This application contains claims directed to the following patentably distinct species:

Group I – the embodiment as shown in Fig 1-11 for example.

Group II – the embodiment as shown in Fig 12, 13 for example.

Group III – the embodiment as shown in Fig 14, 14A for example.

Group IV – the embodiment as shown in Fig 15-17 for example.

The species are independent or distinct because the structural differences are not obvious one from the other whereby search and examination of diverging issues of patentability of the four embodiments in this one Application would place undue burden on the examiner, noting that as claimed, the search for one embodiment is not necessarily required for each of the other embodiments.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. Indication of any claims considered to be generic to more than one Group is important to provide for withdrawn claims dependent therefrom to be rejoined for allowance. However, argument that a

Art Unit: 3676

claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
